

FILTERS | SYSTEMS | APPARATUS ENGINEERING | SEPARATION TECHNOLOGY | SOLID-LIQUID

Clarity is our purpose.

Their experience and expertise is at your service: Rolf Schnitzler (managing director), Julia Schnitzler (managing director) and Jürgen Sebastian (chief technical officer).

We welcome challenges. Problem-solving is our specialty.
Do you have a problem you would like us to solve?

STRASSBURGER FILTER | We offer expertise and clarity of purpose!

We are proud of our past,
but our future depends on the present.

Custom designed filtration solutions for a wide variety of industries are our specialty – and have been for over 80 years. In 1919, Hermann Strassburger founded the company that still bears his name. At that time, he specialized in filtration equipment fabricated from wood, and his first customers were from the fruit juice and vinegar industries. Our development of the plastic filter in 1968 and the switch to stainless steel equipment in 1975 opened up opportunities for the company in a host of new fields.

Our recipe for success: combining traditional values and modern know-how in the development of innovative solutions.

Today, the business is run by a fourth generation management team, whose vision is never obscured by the successes of the past. On the contrary: as a technology leader, new challenges are continually driving us forward to seek innovative solutions for our customers. You, too, can benefit from our patented or patent-applied-for systems – perhaps you are familiar with the patented STRASSBURGER desulphurization process? We will gladly introduce you to our innovative, compact and expandable MicroCross® System for wine and fruit juices, which gained the ISB Innovation Prize in 2004.

In addition to the development of individual solutions to meet specific needs, we offer a one-stop after sales service. Customer satisfaction is our ultimate goal – which is why we are here for you round the clock, 365 days a year!

STRASSBURGER FILTER | A clear solution for every customer!

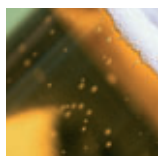

Do you have a filtration problem? It won't be a problem for long if you bring it to us. Our long experience in the field of solid-liquid separation and our innovative ideas enable us to quickly find a solution tailored to every customer's application. Because cost-effectiveness is always one of our key considerations, you can be confident that our products will work for you in the most economical, efficient and environmentally friendly way. Our numerous satisfied customers from a wide variety of industries are clear proof of this.

We know of no problem that is unsolvable.
We guarantee to deliver clear solutions.

Quality remains our top priority for every food and drinks filtration product we supply. This is why you can rely on Strassburger filters for consistently excellent results in respect of taste, clarity and sparkle.

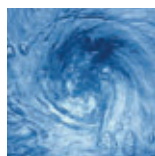

We guarantee that our **MUST AND WINE** filtration processes will retain the full character and aroma of the grapes. Many celebrated wineries both in Germany and abroad rely on the particularly gentle treatment that our modern filtration products provide. We also supply well proven, cost-effective filtration systems for **BEER** to pubs and breweries of all sizes. For **VINEGAR**, too, our highly advanced systems deliver excellent results. Our filtration systems provide the absolute sterility that is so crucial for the life expectancy of these products.

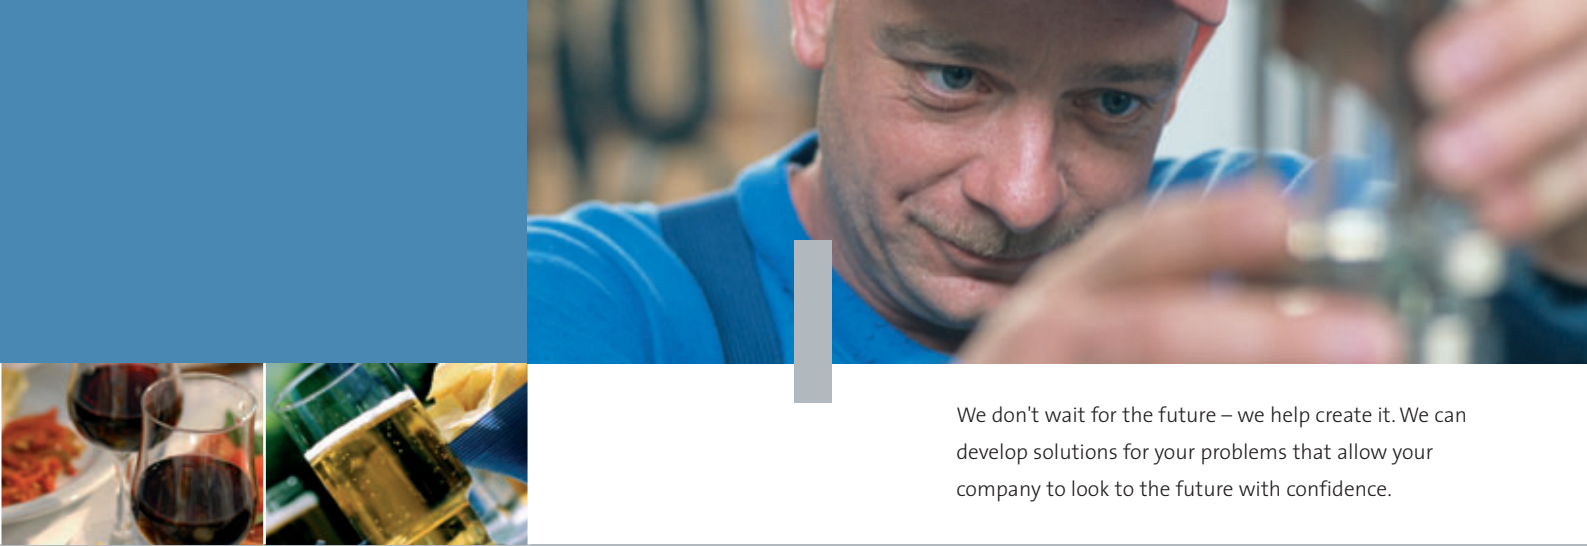

Numerous processes in the **CHEMICAL AND PHARMACEUTICAL INDUSTRIES** have extreme purity requirements, yet involve the use of aggressive media and high temperatures.

Because all of our filtration systems take full account of these critical requirements during development, you can be sure that they will perform to the highest standard at all times.

Because we care about the **ENVIRONMENT**, we employ a variety of technologies to filter different types of effluent. We have also discovered interesting solutions for special niches in this field. Put us to the test!

We don't wait for the future – we help create it. We can develop solutions for your problems that allow your company to look to the future with confidence.

STRASSBURGER FILTER | Delivering clarity through leading technologies!

The benefits of our products are clear.

SF800 ODPC Clean System

Our experience, expertise and continued pursuit of new solutions have made us technological market leaders. We are a strategic partner for our customers, particularly in the field of cross-flow technology and in the design of membrane systems. Our in-depth know-how in a wide variety of fields enables us to deliver individual, reliable, state-of-the-art solutions for the most critical needs. We are satisfied with our products only when they provide a clear solution for our customers.

DEPTH FILTRATION SYSTEMS

Our depth filtration systems are a tried and tested standard for cleaning and sterilizing beverages, solutions and other liquids in many industries. To meet your needs, we offer all sizes and formats.

- Universal filter with filter plates for use with filter sheets
- Precoat filter (diatomite filter) with plates and frame
- Plate versions with and without seals
- With heatable plates and frame – As a sealed system

MCC 4/120 C17

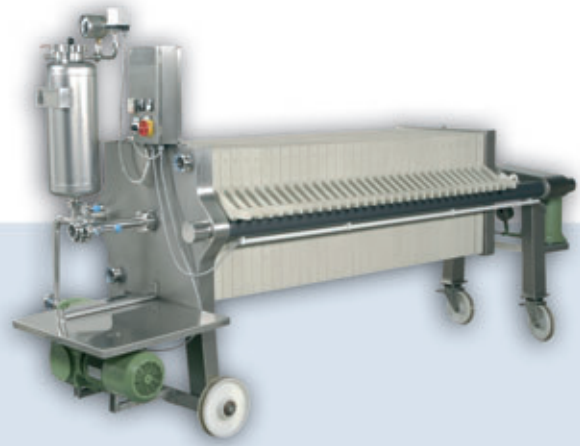

CROSSFLOW MEMBRANE FILTRATION

Our computer controlled MicroCross® systems are fully automatic and easy and safe to operate. Applications range from micro- to nanofiltration in industries such as biopharmaceuticals and environmental technology. The benefits? The process requires no filtration aids – which not only saves money but is also ecologically friendly.

- With hollow fibre modules for microfiltration
- With hollow fibre or spiral wound modules for ultrafiltration
- With tubular modules for reverse osmosis

KFP630 III CE mit Schlauchpumpe

CHAMBER AND FRAME FILTER PRESSES

Our modern filter presses – equipped with safety systems for automatic operation – provide a reliable solution anywhere that solids have to be removed. We would be delighted to supply you with the optimum press for your requirements.

- With chamber and frame plates
- With membrane plates
- Complete systems with feeder (piston or flexible tube pump) for separating solids from liquids, extracting sediment or sludge, or washing the filter cake

We have over 80 years of experience with filtration.
Make our innovations work for you!

STRASSBURGER FILTER | Delivering clarity through leading technologies!

LAB140 mit Schlammkammer
und Wärmemantel

LAB FILTERS

The prefiltration, fine filtration and sterilizing filtration of liquids and gases are an everyday requirement in the pharmaceutical, biology, medicine and food processing industries. Our premium quality laboratory filters are ideal for these operations. Depending on the filtration task, several systems, pumps etc. may be operated in parallel or cascaded.

- Single sheet or membrane filter
- Available with sludge chamber, heat jacket or reciprocating pump

Kolonne 10.000 ND450/II

SYSTEMS FOR DESULPHURIZING “SWEET RESERVE” OR GRAPE MUST

Our desulphurization lines deliver unbeatable results. They are constructed using a patented STRASSBURGER process – in glass. Glass is known to be particularly resistant to aggressive vapours and is easy to clean. Moreover, our patented process makes a cumbersome vacuum pump superfluous and reduces maintenance and servicing costs to a minimum.

- Thermal process for desulphurizing with calcium suspension or sodium hydroxide solution

With our products, you are in the clear!

A company can only achieve world-class build quality when it has modern management systems – which is why we set up our QM system in 1999.

We achieved a very important milestone in December 2001, when we gained DIN EN ISO 9001:1994 certification.

Although this gave us good reason to celebrate, we did not rest on our laurels, and in January 2004, we achieved DIN EN ISO 9001:2000 certification.
